Red Oak Angus Stud 2024

Welcome to the Red Oak Bull Sale Catalogue 2024

As I start to write this years intro, and think back to last year, in good old North Canterbury fashion, mother nature gives with one hand and takes away with the other. We are used to having dry summers and to be fair we got some reasonable late spring growth, but I don't think I have seen this place any drier than it is now. Compound this with skyrocketing costs, (most things I price up are 3x dearer than pre-covid) a sheep market that's sick, lamb is barely ok, but mutton and wool prices are just a joke.

Luckily the cattle markets have remained steady, nothing to do back flips over, but calf sales this autumn have been surprisingly good. Mostly due to North Islanders having an abundance of feed, and a liking for well-bred South Island hill country calves. For our operation here, we have been unable to buy as many calves off our clients as usual due to the dry conditions. We weaned our calves early February and sold any surplus stock to conserve feed. Since then, three months on, its just got dryer, we have been feeding some 350 calves and sale bulls. All sheep and cows are on the hill with good scenery which has been tough for mating ewes. Recently we bought in another 500 big rounds of baleage to keep us going as we had already gone through our winter reserves.

Interestingly, while there are plenty of negatives around at the moment, it does give a chance to show which stock can really thrive when the going gets tough. Cows that maintain body condition and rear a good calf on old dead browntop and cocksfoot.

Our 2024 sale bulls are no different and we were surprised how well they weighed up mid March at 600 day weight time. We introduced some new Australian genetics, carefully selected, with Banquet Quarter Pounder, Millah Murrah Quixote, and Millah Murrah Nugget to benchmark against our own proven pure NZ genetics. The results have been great for our own NZ bred bulls whose progeny had performed well against this so called high performance data from Australia. Across the board you will notice improved EBV numbers, especially in calving ease and carcass traits. EMA scanning was the highest we have done with several bulls scanning in the 90s for EMA in the 430-480kg weight range. One of our keepers this year, a RO451 son RO519 scanned 96 cm at 470 odd kg. We are very happy with the lineup of sale bulls for your inspection, so happy in fact we are keeping three bulls this season, a top scanning PB45 son from ET cow 388/15, RO 522, A very good Banquet QP son out of our top ROHC cow 395/18, and also RO 519 mentioned above. There will be some bulls there with extra bone and growth than normal but still maintaining the thickness, curly coats, soft fleshing, soundness, temperament and constitution are cattle are renown for. We are very much looking forward to catching up after a tough season so far. Remember you don't have to buy a bull to be welcome here and enjoy a day out.

Regards

Rick, Deb, Ash, Tam, Mike and Vanessa

THE RED OAK TEAM

Although every care has been taken to ensure accuracy in this catalogue, the vendor the vendor's agents and printer do not take any responsibility for any errors and/or omissions contained therein.

CONDITIONS OF SALE AND OTHER INFORMATION

Guarantee

All Red Oak bulls are guaranteed for 3 years from date of sale for structural unsoundness, infertility or incapability of service.

Under these circumstances Red Oak will:

- Replace the bull with a satisfactory substitute if available, or;
- Issue a full refund equal to the purchase price less the salvage value.

The guarantee covers the purchase value of the bull without interest, cost or damages.

The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Red Oak and is calculated on the basis that the guarantee is reduced by one third of the purchase price for each year of standard service from the sale date. A veterinary certificate must be supplied by the purchaser on request.

If any bull that is purchased does not possess reasonable fertility, although not totally infertile, any dispute arising shall be settled by an arbitrator appointed by the auctioneers and must be lodged within 12 calendar months from date of sale.

We recommend that all purchasers discuss injury insurance of their bulls at the sale with their insurance provider. This guarantee is in addition to the normal terms and conditions governing auction sales.

Health

All Red Oak bulls are examined by a veterinarian prior to sale day. This examination includes palpation of the sexual anatomy, blood testing and general health assessment.

All bulls have been blood tested negative for BVD and EBL virus. Bulls offered today are from a brucellosis-free and TB accredited herd with a C10 rating.

Bulls

Delivery of bulls is to be taken in the first week after the sale. Vendors are prepared to discuss arrangements to hold bulls for purchasers on condition they are insured by the purchasers as from the fall of the hammer until delivery is given.

Payment

Due date for payment on all cattle sold at this sale is 14 days from the date of the sale.

Delivery

Will be free to the closest sale yards in the South Island and to Feilding sale yards in the North Island for the first week after the sale but thereafter by purchaser's own arrangements.

FMG Insurance

FMG Insurance covers transit and a 14 day period from the fall of the hammer.

Personal Health & Safety

Please be aware that there are many potential hazards on any farm and that you enter the property at your own risk.

POINTS TO NOTE

Red Oak Bulls are:

- ✓ *guaranteed for 3 years*
- ✓ *service and semen tested*
- ✓ *examined for preputial structure and testicular function and had structural assessment by local vet*
- ✓ *grass and hay fed only*
- ✓ *BVD & EBL tested Negative & vaccinated*
- ✓ *a TB status herd of C10 and are Brucellosis-free*
- ✓ *worked by dogs*

D/P 2/2 – GD 7/7 605 a great type to kick off this year’s sale. A 2yr heifers first calf. Thick and deep bodied with a superb temperament like his sire R.O 120. Used then sold 2022 to Ian and Cath Boothroyd, Mt Nessing \$15,500. Grand Dam 283 a top HC daughter with 3 females retained in herd and a son lot 13 in this sale. Used over stud heifers great Red Oak pedigree with data to match, potential here.

D/P 5/5 560 will take your eye, terrific hind quarter, depth and thickness. The first son of 3 AI sires used from Aussie. Good data set featuring low birth, adequate growth, and impressive IMF EBV at 4.9, top 1% of breed. You can see by eye he is very easy doing and this is backed by his high actual IMF scan. These are the types to handle our dry conditions. Used in Stud. Great prospect here.

D/P 7/7 – GD 7/7 First of the BQP sons. Has been a stand out since birth. Weaned at 342kg. I have been impressed with the BQP sons. We are retaining one 579/22 and used 582 heavily over 1st calving 2yr heifers. A bigger frame bull but still maintains thickness bone and meat. Out of an outstanding cow 35/14 sold to Andy Denham at the 100 year sale 2023. Massive growth data in the fella.

Purchaser:..... Price: \$.....

**TARGETED
BREEDING**

We focus on the background, so you can focus on the buying.

Targeted Breeding Quality Check:

All sale bulls **DNA parent verified** and breeding value accuracies enhanced with **Genomics**.

All sale bulls have been **semen tested** and passed for quality, morphology and motility.

All sale bulls **BVD tested and vaccinated**.

All bulls independently **structurally assessed** for soundness.

Bull Fertility Soundness Check:

On Friday the 3rd of May 2024, all Red Oak bulls on offer were subject to a crush side examination to ensure no anatomical abnormalities were present on the reproductive organs.

- The Testicles were inspected and palpated to ensure the presence of two symmetrical turgid testicles with no lumps or deformities.
- Protrusion of the penis was obtained through electro stimulation, of which the Penis and prepuce was inspected for any frenulum's, signs of disease (IBR or papilloma's), damage or deviations.
- A semen sample was collected and evaluated for progressive motility, morphology and density. Any bulls in question were assessed under oil emersion magnification through Eosin /Nigrosin stains.

A pass indicates no abnormalities have been detected which would impact the fertility of the bull prior to the sale.

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser.

For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at **7.6%** of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, injury, or illness.
✓ Theft or death	We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.
